

December 15, 2021

Dear Community Member,

I am honored to have owned and operated Advanced Physical Therapy since 2003, and have enjoyed the many professional challenges and rewards that I have experienced in the last eighteen years. I have been embraced and endorsed by the greater Placerville community far beyond my greatest expectations. Therefore it is with sadness, but also with anticipation, that I have decided that February 11, 2022 will be the final day of patient care at Advanced Physical Therapy. I will miss many aspects of clinical practice including interacting with patients for whom I've developed a great fondness, as well as working to assist them in maintaining/regaining their physical function. I will feel a professional void in no longer being a part of a community health care system that cares deeply about residents of the region. Also, I will miss my role as employer, mentor, and friend of the many great employees of Advanced Physical Therapy.

With the sorrow of my departure also comes the anticipation of moving on to the next chapter of my life. After twenty-three years of employment as a physical therapist--during which I have encouraged patients to "get out and live life" -- I hope to take my own advice.

I plan to continue to provide the same high-quality care for which Advanced Physical Therapy has become known through February 11, 2022. Also, I will gladly help coordinate ongoing patient care as needed. Should a patient require ongoing care after February 11, 2022, other local physical therapy facilities that may be considered include the following:

Cameron Park Physical Therapy

1060 Camerado Drive
Cameron Park, CA 95682; (530) 676-7184

Sierra Orthopedic and Athletic Rehabilitation

4300 Golden Center Drive
Placerville, CA 95667; (530) 344-2044

Marshall Hospital Outpatient Physical Therapy

1000 Fowler Way, Unit 6
Placerville, CA 95667; (530) 344-5430

I am humbled and honored for the trust that has been placed in me during my time at Advanced Physical Therapy and will move forward with many positive memories! Thank you for your support!

Sincerely,

Michael Daack, MPT, OCS
